### Work History

2019-11 -  
Current

#### Test Engineer

- Pit Solutions, Thiruvananthapuram*
- Develop and maintain comprehensive test plans, procedures, and documentation for all testing activities, ensuring compliance with regulatory standards and facilitating future audits.
  - Design and execute thorough test plans to enhance software quality, operating within Agile framework with sprint durations of 10 days.
  - Optimize bug reporting processes to expedite issue resolution and foster better interdepartmental communication, resulting in faster resolution times and improved workflow efficiency.
  - Conduct Requirement Traceability Matrix (RTM) meetings to ensure alignment between project requirements and testing efforts.
  - Review and analyze Business Requirements to create detailed Test Cases, Test Scripts, Test Estimations, Test Metrics, and Automation Test Results, ensuring comprehensive test coverage.
  - Participate in Test Estimation activities to accurately forecast resource requirements and project timelines.
  - Coordinate with clients during User Acceptance Testing (UAT), providing support and guidance to ensure successful validation of software deliverables.
  - Collaborate with development teams to refine user interfaces, provide usability feedback, and propose enhancements to improve the end-user experience.
  - Lead Automation Demo and definition meetings
  - Contact Testing Tools/Skills Languages Personal Skills
  - Leadership Communication with clients, preparing comprehensive Minutes of Meetings (MoM) to document discussions and decisions.
  - Perform automation scripting using C# and Selenium for web automation, as well as API automation utilizing Rest Sharp, to streamline testing processes and improve overall efficiency.
  - Automate Regression, Sanity, and Functional Test suites within Agile environment, leveraging Selenium WebDriver, C#, Azure DevOps, and NUnit in Hybrid Framework.
  - Utilize JIRA for defect reporting and bug tracking, ensuring accurate and timely documentation of issues throughout the development lifecycle.
  - Work as part of implementing continuous Integration/Continuous Deployment (CI/CD) pipelines for automated testing, promoting culture of continuous improvement and efficiency in software delivery processes.
  - Manage code repositories, resolving conflicts, completing pull requests, and merging branches to maintain code integrity and facilitate collaborative development.

### Education

2015-03 -  
2018-05

#### Bachelor of Computer Applications: Computer Applications

*Holy Cross College of Management And Technology -  
Kerala, Idukki, Puttady*
