- Performing API testing using Postman tool.
- Coordinating with Development teams to fix the issues.
- Defect logging and tracking using JIRA.

Client: Auto-Owners Insurance
Client Description:

Auto-Owners Insurance is US Based Finance & Insurance company headquartered in Michigan, Lansing, Michigan, US. It operates in more than 20+ states in US. It provides Commercial Auto,Home & Life insurance to its customers.

Responsibilities:

- Participate in Daily Stand-up meeting, Sprint Planning meeting, Sprint Review meetingand Retrospective meeting.
- Worked on Web Application Testing using Black box Testing Techniques, Regression,Smoke, Sanity, SIT, UAT.
- Worked on Mobile Application Testing for Android & IOS using various testingtechniques.
- Performing API testing using Postman tool.
- Coordinating with Development teams to fix the issues.
- Defect logging and tracking using JIRA.

Project Name: HAMTA
Project Description:

Hamta, uses machine learning algorithms to perform a range of image processing tasks. The algorithms are trained on large datasets of images, allowing them to learn patterns and features that can be used to improve image quality and extract insights. Object recognition, segmentation, and enhancement are some of the many features that you can explore with Hamta.

Responsibilities:
- Participate in Daily Stand-up meeting, Sprint Planning meeting, Sprint Review meetingand Retrospective meeting.
- Worked on Web Application Testing using Black box Testing Techniques, Regression,Smoke, Sanity, SIT, UAT.
- Worked on Mobile Application Testing for Android & IOS using various testingtechniques.
- Performing API testing using Postman tool.
- Coordinating with Development teams to fix the issues.
- Defect logging and tracking using JIRA.

Project Name: VIZAM & CAPIOS
Project Description:

This project focuses on developing robust functionalities for capturing and recording screens, as well as extracting text using an OCR capture system. Allow users to select from full screen, specific tabs, or designated areas for capturing/recording, enhancing user control over the process. Provide functionality to record screen activities, including audio and achieve high accuracy rates in text recognition to ensure the integrity and reliability of extracted data. Supports a variety of document types, including PDFs, ensuring versatility in data extraction

Responsibilities:
- Participate in Daily Stand-up meeting, Sprint Planning meeting, Sprint Review meetingand Retrospective meeting.
- Worked on Web Application Testing using Black box Testing Techniques, Regression,Smoke, Sanity, SIT, UAT.
- Worked on Mobile Application Testing for Android & IOS using various testingtechniques.
- Performing API testing using Postman tool.
- Coordinating with Development teams to fix the issues.
- Defect logging and tracking using JIRA.

Project Name: QUICK ADAPT
Project Description:

Quick Adapt is a User-Guiding Platform from which user can get the onboarding experience and facilitate user engagement within the application. Will be involved in creating and running test cases to verify that tooltips, tours, banner, announcements and other user assistance elements work as intended. Aims to enhance user onboarding, reduce support queries and ultimately lead to a more engaging and satisfying user experience on the platform.

Responsibilities:

- Participate in Daily Stand-up meeting, Sprint Planning meeting, Sprint Review meetingand Retrospective meeting.
- Worked on Web Application Testing using Black box Testing Techniques, Regression,Smoke, Sanity, SIT, UAT.
- Worked on Mobile Application Testing for Android & IOS using various testingtechniques.
- Performing API testing using Postman tool.
- Coordinating with Development teams to fix the issues.
- Defect logging and tracking using JIRA.
